

## **456th Knowledge Seekers Workshop**; October 27, 2022

(Quick Index 12 pp ; Introduction, Topic Index, Transcription, Proofed Need to do ; Key Phrases, Words) (Auto transcription from Elias)

Breakthrough - KF creates Cosmic Ray Fields - which are needed to transmute on planet and U; Weightlessness is balance of Soul with GM of solar system; STM & STP first move to new location before P in transmutation process; DNA not needed - STM provides everything; Cosmic Rays on heartbeat of U; STM works on GM fields of U - not on fields of this planet; Change Knowledge of Man in next weeks; Become detached from P; Quickly regenerate leg; Spiritual manipulations in your emotion; STM and STP keep connection like in dream; Pole shifts; New plasma cities.

### **Topic Index**

Tested 2 strangers in flight system - felt wind trying push off chair; Confirmed that STM and STP move first to new position before transmuting physicality; First transmutation will be an American; 2 new flight systems by December; Without Cosmic Ray Fields - cannot do transmutation even on this planet; Breakthrough in new science - creation of Cosmic Ray Fields by KF; Weightlessness when physicality finds balance with GM fields of solar system (SS)- not really weightless; Our system embedded with fields of SS, galaxy, and Universe (U); Travel with Cosmic Ray Fields; STM has spectrum of all the fields - it's where you tap into it; Have made man traveler of U - access to Totality; Man can reach strength field of Soul of Creator in an instant; Through Cosmic Rays man becomes creator of his dimension (D) and strength anywhere in U; Do not need DNA anymore - STM provides everything man needs in D of P - such as absorbing energy, reproducing, existing, and if needed to manifest itself in that dimension; By having 2 systems feed into each other - dictate span of the fields of the cosmos - travel anywhere in cosmos; Those building system have to understand before go to next step; Next step for man to become One Nation; New systems will interact with creatures of U - feel presence; How will Customs Officers deal with visitors - they will look like man - and speak perfect German - but not from here; Cosmic Rays at level of heartbeat of U; Need One Planet OR to start transmuting people around planet; STM does not work on GM fields of this planet - it works on fields of U and Cosmos; Man's energy comes from 20% food - 80% is from environment - now understand part of Cosmic Rays; You need Cosmic Rays to fully transmute and than to manifest physicality - not enough energy without Cosmic Rays; NASA pictures of exploding gases in U - Gans conversion into gases - Plasma Gas Units; See Soul shine when walk into new systems - feel separation of P from STM - feel love of Creator; I'll change the history and knowledge of the man, in the next few weeks; See knowledge of Creation and Creator - have no attachments to this D of physicality; Because we have access to Cosmic Rays - knowledge gathered up to now becomes irrelevant; P becomes as nothing; Access to knowledge through system; You'll know you've been touched by Love of the Creator; If your Soul reaches maturity during transmutation - don't need to get in car ever again; 2023 will be the beginning of

the world peace - and understand knowledge of Creation; Hardest thing to teach Man was Cosmic Rays - we have reached it - you all will be a part of it; Deepest wish - When Mobile Transmutations land in Linz - bring friend from U with - shock to you; Open 12 KF Institutes around world in next few months - spread knowledge in one go - teach simultaneously; Flight systems with Cosmic Rays have own GM fields - matter state will dilute; You don't fly anywhere - you arrive; Mobile passengers will gradually become involved; I felt how deep the field forces of the system are - in essence of Soul mankind is ready to take next step; Hopefully start Mobile in next 4 weeks - we'll explain clearly what you have to do; Biggest block will be governments trying to hold on and control; We give one guarantee, that anyone who gets in and comes out of these systems, will be peaceful, will not be an addict or an alcoholic, and will never commit a crime; Don't want to rely on world leaders - planet needs to gain confidence with each other; Whole world will decide how to handle unjust leaders - not the Americans; They cannot hide anywhere on this planet through the Soul; We help them understand their Soul and return them back to their position; This month we start shipment of EU - 6 to Arizona; 3 to Germany; Process whole technology in one go - hope humanity is ready for change; (We can control the Cosmic Fields - you can experience what it feels like to be a dog, a tree, or what it feels like in another part of U - by changing the G field strength and the heartbeat); When you went to Moon we couldn't confirm the P - now with Cosmic Rays we can - we can support life anywhere; Told NASA to choose where they want to go; We already have the fields of U - but we didn't know about it - just like we didn't know about the STM in center of brain; When man understands power of new T - will live for millions of years in Earth D; You have to accept conditions at point of arrival - Soul will clothe you and give language; If you travel through mountain but leave leg on top - will quickly generate the leg again; I hope we'll see the end of all the miseries and mayhems for the human race;

More about the Gans painting and Gans process for farming; KS asked help because he says he's being spiritually manipulated by someone enlightened; Referred to U Council - with your Soul; People think this is happening - but no reality to it - it's in our emotions; KF doesn't involve in these kinds of things - scientific organization; KS wanted Mr. Keshe to confirm he was in her dream - replied No (even if I do I won't tell you); Discussion about plasma Butterflies for sale in Store - they react to the environment - in a sealed vacuum pack - do not open; They are living things; KF has nothing to do with "Med-Beds"; You don't dissolve you transmute - like when you dream you return to your bed; STM and STP keep connection; Everything has a history and leaves traces of fields - this is how M fields work you can follow back the traces; Nothing will happen in a Pole shift - everything shifts together - it's a saturation of the fields; Nothing to do with "3 days of darkness" when Sun switches polarity; No special training for plasma Nano coated mirrors - good for Mobile transmutation; A lot of new technologies will be coming with the breakthrough to Cosmic Rays; Man will learn quicker than you think how to live with new transmutation; KF is involved in the background with construction of new cities based on new T and plasma T; Delayed because of focus on flight systems; New cities very different no need for hospitals, courts, prisons, palaces or centers of power - because STM will be mature to understand truth; Micro and macro is the STM

and P - then it changes to P and the STM - going from inside to outside - it's the same. Life will carry on in both dimensions;

## **Introduction to 456 KSW - Cosmic Rays Created by KF**

This breakthrough of the creation of Cosmic Rays Fields in new technology, has brought us to the very edge of the transmutation of the physicality of the man. Up to now we were able to transmute only the STM and the STP, even to the point that we recently discovered, that both of them arrive at the destination first, prior to the physicality, to prepare the move. But without this development we would not have been able to move the physicality - simply because we don't have enough energy to complete the move of the physicality. This is easy for all of us to understand, that the Love of the Creator are the fields of the Cosmos - they are the expression of itself, inside its own creation.

This makes sense why Mr. Keshe said, that the STM does not work on the GM fields of the Earth. And this ties into the fact, that the STM is our connection to the Creator, and why it has the power to do everything once we get enlightened to it. The higher order fields can do everything below it. But as the physicality is a lower order, it cannot move itself. Maybe this explains why some of us have a hard time fitting into the physical dimension of the Earth, because we are more identified with the Soul and the Soul's fields don't seem to work much here.

First, the STM has to have the emotion and desire to move the physicality... then the power is there. Now, through the knowledge of the Creation, Mr. Keshe has taught mankind how to create the Cosmic Ray Fields as a technology. This is what will allow humanity to travel the spans of the U and be totally self-sufficient and manifest where he wishes.

When we mature to this knowledge the detachment will be there, along with the desire to serve. As he said, this knowledge makes all the knowledge man has accumulated up to this point irrelevant, and the physicality will be as nothing. He said, when he went into the system he felt the depth of the fields as so deep, that in essence of the Soul mankind is ready to make the next step. He said the Soul, not the physicality. Anyone who comes out of this system will be peaceful, they will not be a drug addict or an alcoholic, and they will never commit a crime. This is his guarantee to the governments, to not be afraid of these systems.

He said many wonderful things about the new systems that should arrive by December if all goes well. Like those who enter the system will see the light of their Soul shining, and you'll feel the separation of the P from the STM, and you'll feel the Love of the Creator and you can access the knowledge through the system. That if you reach the maturity during the transmutation you don't ever need to get in a car again. That we don't need the DNA because the STM will provide everything from the energy needed to exist, reproduction, and the desire to manifest in physicality. It must be that all of this comes through the Cosmic Rays which are the connection to the Creator and the power of His Love. The Cosmic Rays are at the level of the heartbeat of the U. The 80% of the energy

we receive to exist are made up of the Cosmic Rays, and where the energy comes from to operate the brain. The STM already works on this level, so we had the Cosmic Rays within us all the time, just like we have had the STM within us all the time but we didn't know about it.

For all these wonderful things to happen we need start the One Nation, One Planet, One Race. This is the only way the planet can be governable, maybe that's not even the right word. Because later he said, in the future cities we won't need palaces and places of power, courts, prisons, hospitals, power stations, nor be limited by water supply. Again all this comes out of the Cosmic Rays, which has just been released to humanity. To me this means we must be getting very close to the tipping point of the "Change."

For all this to happen the knowledge has to be released across the planet in one go. They are finalizing the plans for 12 KF Institutes in 12 nations that represent the powers and problems on this planet. The teachings will occur simultaneously across all the Institutes through the Internet. He mentioned there will be an Institute in Brasilia.

There was so much inspiration in this teaching. The year 2023 will be the beginning of the world peace, and man will understand the Knowledge of Creation. He also said, in a few weeks I will change the history and knowledge of Man.

Let us not forget that as KS we still have to do the work of opening our hearts to the truth. To start pondering what was said last week, "if I turn towards the truth, how will my family and friends react?" Do I wait for the EU to be made available in my area, which we don't know how long that will take? Or do I find the love and courage within myself to take the leap of faith, and give everything I have to discover the Soul within myself. It's a decision that we make, by feeling our lives the way they truly are, and not the fantasies and compensations we make up to "feel good" about ourselves, the way Hollywood, Netflix and "social media" have taught us. It's time for us to make a commitment to what we truly want in life, because we are on the verge of being given it. If we do the work on our own we don't need to go into the machine. We become the machine and beacon of light for the others to receive, just like the Satellite Souls.

The beauty is here and let us join our hearts to it. As Mr. Keshe said, "Man will learn quicker than you think how to live with the new transmutation."

Thank you for listening.

## **Quick Index**

Due to important matters about the upcoming change, the time of the workshop was moved to the afternoon. We have been extending our knowledge as much as our team can understand, because they have to build and provide the facilities for it. We have gone very deep into the knowledge. This week we are on the last flight tests of the prior phase. We had a German and a Frenchman who didn't know each other, to try to move from one

system to the other. As you remember, we usually have had couples and people who know each other like husband and wives, brothers and sisters, etc. (They could go to the other side because they had the love of the Soul and they could become part of the emotion).

These two guys were strangers and had met each other just before they went into the system. We asked the German gentleman to move to the right, and also the Frenchman to move. They had no relationship or connection with each other. Since they are not lovers they didn't understand each other. So the one man doesn't see the other man's lap. He has to try to find it in the space. The interesting result was the German who was a big man, felt a push like a wind trying to push him off the chair. This was confirmation for us that the Soul of the Physicality (STP) was trying to find its position before it manifests itself in the physical dimension.

(We understood by this, that the STM and the STP first move to find the new position before the physicality arrives. They can even interact with the STP of the other person, or entity, to confirm their existence, or their presence, as if to say, "I am here.") This has brought us to a new dimension of work, and that what we setup is correct. (We have finished with this part of the system).

Hopefully we'll complete the next 2 systems by December, in which we should be able to physically transmute a person from one system to the other. We will try.

We have already started setting up to transmute the first person from outside the flight room to inside the flight room, in the system. We are doing a lot of test for this. (The first transmutation will with an American, who will be transported into the flight system. At that point, we'll see how far we can push the envelope, in completely holding on, and manifesting him in the flight room. We are entering into negotiations with who and how we'll bring him in).

The technology has moved on even further and has become very advanced. We have had a breakthrough, that allows us to go directly into the next phase of the space technology. We have developed and are testing what is known as cosmic rays. (Up to now our systems have only been dealing with the STM, in the physicality (P) of the Man within the space of a room).

(Our planned space flight for the upcoming new year of 2023 to Moon and Mars cannot be done if we don't understand cosmic rays and learn how to create them. At the moment our system is only Earth bound. We need to understand the interactions of the fields of the universe, so that we can create the condition of the cosmos in our system).

(KF has made an essential breakthrough, in that now we are able to create plasmatic cosmic ray fields. We know and understand them, and we feel them. We are developing a structure to bring these cosmic rays into a Totality, that when they are in the flight room, the 2 systems are as part of, one part of the universe).

(You move from one room to another, but the Totality sits inside (?? the system). With this development the new system becomes a universal system. By the time the 2 new units are ready to go, we'll have 2 new Vertical units as well, that are getting developed. We will transfer people from the flight room into the Vertical units, which are outside the flight room, or from one Vertical unit to the other, or from the Vertical unit back into the flight room. (We will test these 3 processes)).

This development gives us new opportunities to create a new structure for transmutation and transportation, and all the other things that we need. (This was the biggest step that we needed to do, to be able to land you on the Moon. Because without being able to create the conditions of the cosmos, man cannot become a traveler of the space. We have to understand the interactions of the cosmic rays and how to create them).

On Earth, we depend on the fields of the gravitational (G) and magnetic (M) fields of the earth. In the Solar System, we are dependent on the GM fields of the solar system. The Solar System has its own gravity and M fields. Mankind has not even been able to measure them yet. We consider the gravity on the Moon, which is so much lighter Earth's gravity. Now, we have to understand G field strength of the Solar System.

This is why we see weightlessness (when people are in space, which is the space of the solar system). We never understood that it's not weightlessness, (it you, in the GM field, of the solar system. The physicality of the Man has found it's balance with the GM fields of the solar system). If we can survive on Earth and on the Moon, man should now be able to understand how to live in the Solar System, without place, dimension, and position. For this reason, we need to develop systems, (that are embedded with the fields of not only the Solar System, but also of the galaxy and the universe).

At this moment in time, we have achieved the creation of cosmic ray fields. We have reached the knowledge, (and are on the cutting edge of technology. When we go into these two new systems, we become part of the universal field forces, where inside it, we create both the field forces of the Earth, and those of the STM).

(But man will travel at the strength of his cosmic ray fields to another position), and not as an Earth or a STM field. Don't forget, the STM has a span of fields. He draws a spiral and places the strength fields of the STM, the Earth, the Solar System, and then the galaxy.

Now in this room with this system, we have access to the Totality. You can see how easily I have made the Man, a traveler of the universe without using fuel, or having to burn or destroy anything. And he doesn't have to travel for hundreds of thousands of light years.

Man needs to be enlightened to understand, that he can reach the strength of the field of the Soul of the Creator in an instant. This is what we have to understand. This is where the next generation of flight systems will take you.

In one step, by adding cosmic rays, which is the field of strength of the universe in the dimension of the totality of the flight systems, we have brought man to become the creator of his own dimension and strength, anywhere in the Universe.

What will happen to your dimension of physicality? Does the DNA of the man have any meaning in another part of the universe? Or do we work on the strength of the STM, and the DNA, or the construction of the physicality, will take place at the point of the interaction. The totality of the STM will meet all the needs of the dimension of physicality, such as absorbing energy, reproducing, existing, and if needed to manifest itself in that dimension.

(The creation of the universal cosmic rays within the laboratories of the KF is a major breakthrough in the next steps of the flight development. The flight systems, which comes into operation instantaneously. By having the 2 systems feeding into each other, we can dictate the span of the fields of the cosmos. We can set the field strength for one passenger to go to the Moon, and another to the next galaxy. Because now we covered the whole spectrum of (the ?? cosmos).

The experts and technicians who are building our systems have to understand this before I can move them to the next one. Otherwise, it's a magic job. We are on the verge of a major breakthrough for man to understand and be part of the next step, and for Man to be One Nation. We can extend the fields of the 2 systems to be the field strength of the Earth or even the Solar System. When you're in this dimension of the fields, New York, Tehran, and Mexico City are all the same.

(Now, with developing these new space units, it brings you the understanding of the Totality of the process of the Creation. In these systems we have achieved the dimension of cosmic rays, and we have done it in a very simple way. And by our people understanding it, it will bring all of you, such a sweet knowledge).

Once these systems are completed and start running, they will interact even with the creatures of the universe. We will see them manifest within the systems. We'll feel their presence, and if we give them the security of the love of the man, and the love of the Creator, they'll manifests themselves within the systems.

The only problem is, how will the Austrian customs officers give a visa to somebody from planet Zeus. He will arrive without a passport, but he'll come in the clothes of the skin of the man, understand the Totality of the man, and will be able to speak fluent German, even though he is not from Earth. The confusion for the governments will be bigger, than for you as KS.

One of the major breakthroughs in the development of the science for space travel, has been the production of cosmic rays, at the level of the heartbeat of the universe. In the next 3 to 4 weeks the systems will be ready for those of you who want to be the travelers of the universe. (That is if we don't go to (the next) level of knowledge), which at the moment man cannot understand.

Many of you came into our system and you went to the ocean, or to your grandmother, or you went to your own house, or wherever you went. Now in the coming weeks, you'll be able to travel the span of the universe. You will be universal travelers. The first two travelers will go to the Moon, and the next two will go somewhere else. Then we'll start building what we call One Planet, One Nation, One Race, so that we can send and accept people from one point to another.

The biggest problem for full transmutation was, that the STM does not work with the MG fields of the Earth, rather (it only) interacts with the fields of the universe, and the cosmos. (Therefore and we could not transmute man from one place to another, in the full dimension of the Soul, and then convert him to physicality. We needed to have access to the direct resources of the cosmic rays).

Go back (and find the prior teachings where I gently mentioned, that our body only absorbs 20% of the energy we need through the food we eat. The other 80% we receive from the environment. Now we understand that part of that 80% comes as an energy from the cosmos, as cosmic rays. Now you understand the connections through the references to the past teachings. Even to be able to take man from one position to another on this planet, we need to have the fields of the universe available. Because the fields of the Earth themselves, (are not strong enough) to support such a transmutation).

The body of the man gets that 20% of the energy from the matter state conditions of this planet. Man never understood where the other 80% came from, and how his brain absorbs so much energy. It comes from the cosmos, the environment of the cosmos, and the environment of this planetary system. We would not have been able to fully transmute you and make a full conversion to physicality, if we could not deliver the cosmic rays.

Now a technology, where we do not work with the matter state anymore, is in the hands of the man. You've all seen pictures from NASA of the beautiful gases exploding in the Universe with different colors. (This was the ?? reason we brought in the Plasma Gas Units, and the conversion of Gans's to gases. So that you would be ready for what we brought you today. We do not rely anymore on matter state fields, we rely on the fields, of the fields of the universe).

When many of you walk into these systems, you'll see your Soul shine. You'll feel the separation of the physicality from the STM. You will see and feel the love of the Creator, which is abundant in the Universe.

I'll change the history of man, in the next few weeks.

I will change the knowledge of the man, where man will see the knowledge of the Creation and the Creator, and have no attachments to this dimension of physicality, as what we see today in the man. (We will understand so much more, that literally this (physical dimension) becomes as nothing).

The knowledge we have gathered up to today becomes irrelevant, because now we have access (to the cosmic rays. It will be like the lady who couldn't speak English, and then after coming out of the system, she could speak and understand the emotion of English. It will be like what we have seen with all the people coming into the systems and doing all sorts of things. All of you will have access to it).

When you walk into these new flight systems, which carries the cosmological field strength of the Universe, you'll know you've been touched by the love of the Creator.

Those of you who booked in for transmutation to the Moon and Mars, you will feel it. Then the beauty of it is, once we teach you, and once you see it, then we open the cage of the STM and you become passengers of the Universe.

When you come to Linz for transmutation buy a one way ticket. Because once you leave the system, if you decide, if your Soul has reached the point of maturity of understanding in the system, you will never, ever will get into a car again. You will not have to dream how it feels to be on the backside of the Moon, or how Jupiter feels, or how it feels in another Galaxy, because by your wish, you will go there. You will taste, smell, and feel it, the way the Knowledge Seekers who went through the system explained it to you. They didn't traveled, they arrived. Then we understand how much the knowledge of the man will change.

The year 2023 will be the beginning of the world peace. The year 2023 will be the beginning of understanding the new knowledge of the Creation. The year 2023 will be where the man becomes educated with the knowledge of the Universe and Creation, in the true way, and not what he imagined it to be. We'll see the travelers of the universe with us, as we ourselves will become travelers of the Universe.

One of the biggest and hardest things for me to teach man, was how to build a system that could deliver sustainable cosmic rays, and could create the GM fields of the cosmos. It was hard because the man himself has to understand it. And now we have reached that point. The systems are here, they have been made and are getting tested. Soon you will be a part of it.

(The people who signed up for the Mobile transmutation will be one of the first ones to see and feel what we are bringing you. It is my deepest wish and hope, that when you land on the front seat, you bring a friend from another part of the Universe with you. How will you handle it? To me they are friends, but to you it will be a shock to your system).

We'll try to bring this new dimension in, so that humanity understands the change. We'll try to bring this dimension in, so that we can share the knowledge. We will open institutes in specific human positions in the coming months, like in Tel Aviv, Tehran, London, Arizona, Beijing, Delhi, in Brasilia, and other places. We'll work that the knowledge is shared irrespective of color, race and religion. We'll teach you all

simultaneously in the Institutes at the same time, (so that everybody learns equally). Just like we are teaching you today online.

In the next few weeks you will see the establishment of the KF Spaceship Institutes in 12 nations, (which have been chosen because they are the center of power and conflict. Our priority is to bring One Nation, One Planet, One Race into operation. We are ready for it to start. One of the reasons we delayed the teaching of today was for this purpose. We were waiting to confirm a meeting that will allow us to bring everything together and start).

(The cosmic ray field forces created within the flight system, will have their own GM field, then the matter state materials of our systems becomes irrelevant. They will dilute the system, and the fields themselves will dominate the room. We still can go further with the technology, which is in our hands. We can expand this beyond the dimension of physical observation, which means the man will not see it, but he will feel it).

It's not your physicality in the room. In the space of the space, it is your Soul. Then does your DNA matter? It's irrelevant. Does the color of your eyes and skin matter anymore? It's irrelevant. The cosmic flight systems is one of the steps, that will bring man to maturity. We set it up especially to do this, in the past 4 or 5 weeks. It's ready to be adopted, to become part of the operation of the cosmic flights.

(We have finished with the part of the flight tests where people came into Linz. Now there are Mobile transmutations that will go through this process. Those of you who signed up for the Mobile and the Moon flights will become gradually involved. We'll move the Mobile passengers from one place to another, and gradually establish a new way of flying, because you don't "fly" anymore, you arrive at the destination). This is part of the progressive development of the knowledge.

When I walked into the system this week, I was amazed at what I could feel. How deep the field forces were. Not in the essence of the physicality, but in the essence of the Soul. Mankind is ready to take this next step up.

Hopefully we'll start the Mobile transmutations within the next 4 weeks. Our first passenger has been chosen. We have moved certain things into position in Austria, so that we can go through the process and deliver. Then we'll inform the people registered for the Mobile program. We'll tell you what you need to do. We'll explain to you clearly what you need to do, and ask you where you want to go, and what you have to do before we can move you.

If you live in Los Angeles want to go to Tehran, you have to follow a systematic process. We need to get you de-registered in the United States with the American customs, and enter you into territory of Iran in hands of the Iranian authorities. If you want to go to Japan, or from Beijing to Austria it's the same procedure. And if you want to arrive in Linz, it's the same. Until we establish a system, that the governments feel good about, and allow the free movement (of people on this planet).

The biggest enemy, the biggest block for us coming to this point, will be the governments trying to control, trying to keep hold, trying to be, trying to confine. There's one guarantee we will give. Anyone who gets into these systems, and anybody who comes out of these systems, will be peaceful, will not be an addict or an alcoholic, and will never commit a crime.

This is the cornerstone of the new development of the new technologies. (We have to go step by step to gain the confidence of the different parts of this planet with each other. We don't want to rely on world leaders. As I said to the American officials a few days ago, which of the world leaders do you want to bring in, to stop the mayhem? We don't need to take them to Den Haag, or to go through years of courts. If we want to move a world leaders somewhere, not to the Americans, but where the society as a whole agrees for them to be. Do we need to move the head's of the states, which are what we call, unjust, to a position for them to understand through their Souls, what their position is. And then return them back. There is nowhere on this planet or in Universe (they can hide. We can find them anywhere through their Soul). The reality of the knowledge and the way we will touch, will be shown in the coming weeks and months.

As of this month, we have started the shipment of the Universal Enhancement Units. This is prelude to what has been achieved and what is going to be done. Six units are getting set up to go to Arizona, three units will end up in the German Keshe Foundation center. The assembly production, in which the materials has already been paid for, will start in December or January. Then we'll start delivering the Enhancement Units. We have started this week.

We'll process the whole technology in "one go." I hope humanity is ready for the change to come. I hope man can understand the change that we are bringing. And I hope, sooner than later, that the world governments agree that to be governable, we need to govern as "One Nation." Otherwise, there is no where on this planet, that they can hide and duck.

Development and delivery of the cosmic systems, which (will allow Man to live in the Universe is in the process of completion. (We can control the cosmic fields as they are for the whole Universe. Or we can change the parameters inside to the Earth level, or to the level of the fields of a dog, a man, or a tree. If you want to feel how a tree feels, now with the completion of the cosmic rays, it's possible).

You wanted (to experience what it feels like to be from another part of the Universe, now you can do it, by changing the environment inside in G field strength, and the heartbeat, and the condition of the field forces of the GM field of that position, time, and space). You will arrive there, instantaneously.

In the beginning many of you said you went to the depths of the ocean, or you said, you could feel the Moon and pick up the stones. We didn't laugh, instead we learned from you. (Look how far our technology has come, and is correct, and you can feel it. The next step was to be able to bring along the physicality. Because up to now we could not

confirm the physicality being on the Moon and Mars. We didn't have the cosmic ray levels that could support your life on the Moon. Now we have it and we can do it).

I said to our colleagues in NASA, very soon you can chose where you want to go, and we'll take you there. (Because we have) the understanding of the Totality of knowledge of the Creation, in the bandwidth of the strength of the life of the man in the dimension of the Soul. (We have the dimension fields of the Universe, and the Unicose, which up to now we didn't know about. Just as we didn't know our Soul was in the center of our body. Now we can move to whatever position instantaneously).

It's for man to understand the dimension of the field forces of his creation. And for Man to understand the power that this new technology will give to him. Man will live for thousands of years, millions of years on the planetary Earth, dimension and size.

We'll try to explain this in more detail, that gradually in next 4 or 5 weeks, those of you who have registered for the Mobile system are prepared to move. We don't want to bring you here to Austria. After the first 2 or 3 trials, then you'll appoint a place and a time on this planet where you want to go, and then we'll move you there.

(It's up to you to be prepared for whatever the conditions are at the point of arrival). You have to accept it, because it was your wish. If you live in a cold place in Canada, and you wish to be in California, or Florida with your son, or brother, then sometimes you'll end up there with a perfect American accent, and the clothes for the beach, which your Soul choose to cover you with.

It will be very interesting. How many of you will make an appointment to meet your brother or your lover in the depths of the ocean, in a submarine. And how many of you will go to the depths of the caves to see if you can be seen, and whether you can be taken through the matter state of Earth's materials. It's there for you to test it. The only thing is, you can fail and part of your leg may be left on the top of a mountain and the rest of you down in the cave. But then it will be fantastic to see, how fast you can generate that leg that you left on the mountain top.

This is now a reality, as the Frenchman felt the push of the STP of the German. As I always say, we welcome you to the new world of science, technology and understanding of the Creation of life on this planet. And I hope we'll see the end of all the miseries and mayhems for the human race.

During the break there were no videos again, and Rick and Mr. Keshe talked about the paintings and products of the KF Store.

### **End of Part 1 Quick Index 456 KSW**

Gans Paintings shown by Rick (no videos again this week during the break, Mr. Keshe speaks some things.) Next week display the wines grown with Gans process. Joel in France is helping people to learn the Gans process for farming.

Q: ( A KS was asking Mr. Keshe to pray for him when he is in the fields of the system, because he says, somebody who was enlightened is manipulating him and trying to ruin him.

K- We leave that to Universal Council and those who are there.

R: Should Nick try to contact Universal Council?

K- You don't need to do it. It's done at the Soul level.

You see, sometimes we think (people are doing this to us, but there's no reality to it. It's all, what you call, emotion, in which we feel somebody has done something to us, or whatever.

But we don't get involved in these kind of things. We do a scientific work.

Another KS asked Mr. Keshe if he felt her last night, because she had a dream of him.

K- No. And even if I do I won't tell you anyway.

Q: The butterflies from the Keshe Foundation have started changing over time since we began using them. It seems a white materials is being produced. What exactly is happening? Can you elaborate?

K- What you mean? The Butterflies are living things, and they react with the environment, and absorb energy from, and give to the environment. They are a living field, it's not just a black piece of wire.

You might see a color change, or absorption of some material, which would be in the environment where you live. It could get saturated with certain kind of fields, and matter states that would then manifest itself within the (vacuum pack).

They are constructed in a specific way, and they do interact with the whole of the environment. They're in a vacuum pack so they don't (physically) interact with the environment, unless you accidentally made a hole in the package. You have to keep them in the vacuum pack. Do not take them out.

(It's nothing to be concerned about if they interact with the environment and change color or materials form on them).

(Please note that I and other KS have received the Butterflies that already have a white Gans coating on them. Perhaps this person did not see or expect that to be there, and then thought something happened ?? ).

We have nothing to do with "Med-beds." Next question.

Q: How to dissolve ourselves after manifesting physically, if we want to return?

K- You don't dissolve, you transmute. (Our body does this in our system, and we always do. You do this when you dream and you go somewhere. When you wake up you're not somewhere else, you're still in the same bed. In the structure of the STM and STP, there is a way it keeps the connection to the position and the space of the movement. You can go to 20 different places, and then you can come back to the first place.

Q: How can we separate the different emotional histories of the plasma fields?

K- Everything has a history.

R: So, if plasma field has an emotional history, how can that be separated, since the fields are interacting so much?

K- (It leaves traces. I talked about this a long time ago. You always leave traces. It's part of the structure of the field of the Universe. This is how magnetic fields work. You can always go back down to the trace.

Q: What happens when there is a pole shift, like one in the next six months? Does it have something to do with us and the flight transmutations?

K- Primarily nothing should happen. It's just a shift. Everything shifts from the North Pole to the South Pole. It's a saturation (of the fields), nothing should happen. I explained this to a child what happens. It doesn't make any difference if you're standing up, or if I hold your legs upside down, you're still there, you still live. It's just a field, and everything else will switch with it, so that it holds in the same position. If such a thing happens, it will be registered in the geological layers, as in the previous times it has done. We'll see it.

Q: And it has nothing to do with the "three day of darkness"?

K- I don't think so. If it has, what do you call it, the Sun changes polarity so often we don't see it, and everything else.

Q: Is there a special training for how to use the plasmatic Nano coated mirrors for the Mobile transmutation?

K- No, no. You can use it when we do the Mobile program. It's the best thing to use for it.

Now that we have gone into the cosmology, or work of cosmic rays, a lot of new technologies will come up. In the coming weeks and months, you'll have a lot of new understandings, and a lot of new things will come out of the Keshe Foundation. Because up to now we didn't have access to create cosmic rays, but now we can. It will bring new dimensions.

Man will very quickly learn how to live in this new transmutation through the Soul. Very, very quickly. Quicker than you think. You'll be so busy with it, you won't even remember how (you used to live).

Q: Can I take my dog with in the Mobile transmutations?

K- Yes. You can bring your suitcase. We will become like Ryan Air (jokingly). For an extra suitcase you pay a 1,000 extra, and for the backpack will be half price, for the dog will be 3 times the price.

Q: It's a small dog.

K- The size doesn't make any difference. The size doesn't matter. It's just the Soul we have to carry.

Q: How is the construction of cities based on plasma technology going, and can it be replicated in other countries?

K- It's something we work on in the background. We're involved in 2 or 3 different locations. Because of what we went out to do in the past 12 months, we left a lot of these projects just to be there till we are ready for it. I hope we're very soon ready for it.

With what we achieved now, where we are now, we should be able to create new dimensions even in what we wanted to do before. I'll explain this in a very, very slow way, that how we can actually create the fields of, without the matter states, and how we. We have to deliver it in a step by step position over the next few months.

Do we need to build the cities the way we do now? Do we need a lot of things, which we have in the cities today? I don't see any room for hospitals the way we have it today. Nor courts and judges, prisons, nor churches and mosques. Because the STM is mature to understand the truth. I don't see any reason for palaces or centers of power.

Gradually we'll come to understand all of this, and very slowly we'll change it. We don't need to build cities based on water or power supply anymore. A lot of things will change.

Q: .. When the Lord said, that a material state within the system is irrelevant, we can compare with the human system, that when we ingest food from the moment it enters the mouth, it no longer behaves like a material state, but as fields.

K- Yes.

Q: That is why we say that, it is so in the macro as well as the micro. The Universe that is inside of us?

K- Yes, more or less, or 100%. Micro and macro is the STM and the Physicality of the man. Then it changes to Physicality of the man and the STM. Going from inside, out. It's the same. Life will carry on in both dimensions.

R: There is a saying, make the inner as the outer, and the outer as the inner, and then make the two, one.

K- I hope we gave you enough information and knowledge today to understand the changes that will come. The changes which are on the way, and how humanity will handle this new change.

End of Quick Index , 456 KSW October 27, 2022

## **KEY-PHRASES:**

## **SUMMARY:**

## **ENGLISH TRANSCRIPTION**

(:21).

K- Yes, as we say, good evening, good afternoon, good morning to all of you, wherever and whenever you listen to these series of Knowledge Seekers (KS) teachings, (:22). by the Keshe Foundation Spaceship Institute, as part of the knowledge sharing and understanding the new technology. Today, due to some matters, which were rather important for us, we had to step back and change the time from morning to afternoon. But this isn't the first time we've done. We have done this a few times in the past. What is important is what we gain in knowledge, what we share in knowledge, and how the next steps will come in. As all of you know, we had a number of you in the Center in the past few weeks, and months, and we have learned a lot from you. We learned a lot, and we added a lot.

We extend our knowledge, as much as our team can understand, that they can build and provide the facilities for it. We have gone very deep in the knowledge. We had some interesting group of people this week, very small number. What I call, these are the tail end of the flights people who came to test and experience, and see what they can help us to add to the knowledge. And we heard in a way, what it is. We tested everything, we needed to have the confirmation, that systems are exactly what it is, before we go on to the next phase.

We had a very interesting experience, the last two people this week, which I think would have been in the middle, some will come in the future. It was very interesting. One German, one French don't know each other. And we wanted to understand as a last part, moving from one unit to another. Because before we had a husband and wives, we had couples, we had brothers and sisters, we had mother and son. We used to tell them if you can go to the other side. (:24). They went with the love of Soul, they became part of ?? emotion.

But these two guys were strangers. They just met each other, and they went in the system. The interesting part is as one last part of the teaching, or testing, we asked them to move one to the left, and one to the right. And in that process, we asked as usual, before from the German gentleman, if he can go to the right, and how it was felt. Then we did the same thing with the French gentleman. What was interesting, because these two had no relationship, no connection. In putting them into the machines into the system's. The Frenchman sitting at the front, and the German on this side. We asked the German try to get to the seat on the other side. They're not lovers. They don't understand each other, they have no connection. So the man doesn't see the other man's lap. He tries to find a space to it.

When we finished, the interesting result came as we thought. The confirmation of. The German felt falling off the chair on the left. As always is. As they try to go to the other one. But the interesting part was the German, a big man, on this seat, felt the push on the side like a wind, trying to push him off the seat to the side. Which is confirmation of Soul of the Physicality (STP) trying to find its position before it manifests itself in the physical dimension (D).

### **STM & STP first go to the new position before P arrives**

This was important to us as a confirmation, that the Soul, and the STP, move to find a position, before the physicality (P) arrives. And even they can interact with the STP of the other person, or entity, (:26). and confirm their existence, confirm their presence, confirm "I am here."

This has brought us into a new dimension of work, understanding, that is correct, what we set up. As we had the others, we had the mother with two children this time, and we did a lot of tests, what will happen, what will the children give, what the mother gives. Other children ?? speak to the mother, and we gained a lot of understanding in that process. But in a way, we have finished with this system.

The next two systems, which hopefully be completed in next two or three weeks, maybe by November, or what you call, December, are the two new systems, what we call, which will take their position in this area. Where we should physically transmute, a person from one to another. What we try.

We have already started setting up to transmute the first person out of the room into the system. We are testing. We've done a lot of tests with it. And we start the first transmutation, is in American, who will be brought into the environment of the what we call, flight unit. At that point, we'll see how much, how far we can push the envelope, in completely holding on, manifesting in this area, and allowing him to become part of the environment of the first flight. In the next few days we enter negotiations with who, and how we'll bring in, and how we bring it in. We're setting up the criteria to understand.

But the technology has moved on. (:28). The technology is very advanced. We have managed as a breakthrough, to be able to go directly into the next phase of the what we call, space technology, we have managed, we have developed, and we are testing, what is known as cosmic rays. Because when we finish this unit, which is coming in, we are not going to build another system for a space job. Up to now in the systems we have here, we are dealing with man, the STM, in the Physicality of the Man within the space of a room.

We are. We have informed you, many of you are aware that, in the new year 2023, we are going for a spaceflight. We have to have a system for it. We just can't do, to become part of the space technology into deep space, we need to create, to understand cosmic rays.

We need to understand the interaction of the fields of the universe. We need to be able to isolate. We need to be able to create the condition, that our system is not Earth bound, but has a condition of the cosmos.

### **KF has achieved creation of plasmatic Cosmic Rays**

So, Keshe Foundation has achieved, creation of the plasmatic cosmic rays, fields, we feel it, we know it we understand it. And now, we are developing a structure to bring these cosmic rays into a Totality, that when it's in the room, the 2 systems are as part of one part of the universe?

In a way, you move from one room to another. You move in the direction that the Totality sits inside. (:30). It's not any more, what is, what has been put in. The dimension. The work of the new system is that, it becomes a universal system. By the time the 2 units here are ready to go, 2 Vertical units are getting developed. Our work will be to transfer people from the room into the Vertical units (which are outside the flight room), or from the Vertical units to another Vertical unit, or from the Vertical unit back into the room.

So, this gives us a new dimension new opportunities, a new structure to create the condition of transmutation, transportation, and every other things that we need. The biggest, the next step, for us to land you on the Moon, we need it. We have to, to create the condition of the cosmos. Without cosmic rays, without understanding the interaction of the cosmic rays, man cannot become a traveler of the space.

On Earth, we depend on the fields of the gravitational (G) magnetic (M) field of the earth. In the Solar System, we are dependent on the field of GM of the solar system. The Solar System has its own gravity, has its own M field. Mankind has not even measured that. We consider our gravity on the Moon, which is so much lighter than the Earth. Now, we have to understand gravitational field strength of what we call, the Solar System.

This is why we see weightlessness, (:32). because we never understood that, that is the field, GM field of the Solar System. It's not weightlessness. It's you. It's the physicality of the Man, which has found it's balance with it. So if we can survive on Earth, if we can survive on the Moon, man should now understand in this, be able to live in the Solar System, without the place, dimension, and position.

For this reason, we need to develop systems, with that, embedded in it, encapsulating it, and the fields of not only the Solar System, but the fields of the galaxy, and the fields of the universe.

We have achieved that, at this moment of time, we have systems that creates that cosmic field rays. We have reached the knowledge, the verge of technology, that when we go to these new 2 systems, we become part of the universal field forces, where inside it, we create the field forces of the Earth, and inside it, we create the field forces of the STM.

Then, we travel the man at the strength of his cosmic ray fields to another position, not as an Earth field, or as a STM field. Don't forget, the STM has a span of fields (he draws a spiral). Here, we were at the STM, here we are at the soul strength of the what we call, the Earth, and the Solar System, and somewhere here is the galaxy.

Now in this room, now, with this system, we have access to the Totality. (:34). Now you can see how easily I have made the man, the traveler of the universe without the fuel, without burning and destroying anything, without traveling hundreds of thousands of light years.

Man needs to be enlightened to understand he can reach the strength of the field of the Soul of the Creator in an instant. This is what we have to understand. This is what the next generation of the what we call, flight system, you come into, will take you to.

In one step by adding cosmic rays, by adding the field of strength of the universe in the dimension of the totality of the ?? systems, we have brought man in the dimension to become the creator of his own dimension and strength, anywhere in the Universe (U).

But what happens to you? What will happen in dimension physicality? Does the DNA of the man has any meaning in another part of the universe, or we work on the strength of the STM, and the DNA, or the construction of the physicality, will take place at the point of the interaction, where the Totality of the STM meets all the needs of the dimension of physicality, to absorb energy, to exist, to reproduce, and to manifest itself, if need be.

This development of what we call universal cosmic rays, within the laboratories of the Keshe Foundation is a major breakthrough in the next steps of the flight, and the flight systems, which comes into operation, instantaneous. In a way, with having 2 systems feeding each other, we can dictate the span of the fields of the cosmos. (:36). You would like this strength be to the Moon for this passenger, and the next one, to be the next galaxy. Because now we covered the whole spectrum of it.

Our technicians, our experts who are building it, have to understand this before I can move them to the next one. Otherwise, it's a magic show. We are on the verge of a major breakthrough for man to understand the next step, for man to be part of the next step, for man to be One Nation. We can extend this fields of the 2 to be the field strength of the what we call, the Solar System, or to be of the Earth. When you're in this dimension of the fields, New York, Tehran, Mexico City is all the same.

Understanding this process, which brings you the Totality of understanding, the process of the Creation. Now, with developing these new, what we call, space units. Now, having achieved that dimension of what we call, cosmic rays, in these systems, and the simplicity, that we have achieved it, we have developed it, and our people understanding it, will bring in so sweet knowledge to all of you.

That in the next few weeks, once these systems are completed, and start running, and they start operating, will interact with even the creatures of the universe. We will see them

manifest within the systems. (:38). We'll feel the presence, and if we give them the security of the love of the man, love of the Creator, they manifest themselves within the systems.

The only problem is, as I said to a friend of mine, how does the Austrian customs officers will give visa to somebody from planet Zeus, when he comes with no passport. And he comes in the clothes of the skin of the man, understand the Totality of the man, speaks a fluent German, but is not from here. The confusion for the governments will be bigger, then you as KS.

Development and reaching the production of cosmic rays, at the level of the heartbeat of the universe, has been one of the major breakthroughs in the development of the science for space travel. Now we understand, that in the next few weeks, those of you who want to be the traveler of the universe, the systems have already started to take shape, and will be ready in the next three to four weeks. If we don't go to another level of knowledge, which at the moment man cannot understand.

So in the coming weeks, as many of you in the past came, and you went to the ocean, you saw the grandmother, you went to the house, and whatever you did. Now you will travel the span of the universe. The universal travelers. (:40). The first two will go to the Moon, the next two will go somewhere else. And then we start building what we call One Planet, One Nation, One Race, that we can send people, we can accept people, we can bring people from one point to another.

he biggest problem for mankind to be able to do the full transmutation was, that the STM does not work with the MG field of the Earth. It interacts with the fields of the cosmos, fields of the universe, and we could not, we could not take men in what we call, a transmutation from one place to another, in the full dimension of the Soul ?? in the conversion to physicality, if we did not, if we could not have access to direct resources of the cosmic rays.

Go back to the teachings of a few months, few years, and I repeated it very softly, you pinpointed, we know where they are in teaching. I always said, our body not only absorbs the fields, 80% of the energy of itself, we eat 20% of it. The other 80% comes, part of it is cosmic rays, part of it is the energy from the cosmos. Now you understand, now you see how they get connected. Now, you can find references to the teaching of the past. That, to be able to take man, even from one position on this planet to another, we need to be able to give the fields of the universe, availability to it. Because the field of the Earth themselves cannot support such a transmutation. (:42).

The body of the man takes that 20% energy from the matter states, from the condition of this planet. The other 80%, that the man never understood how his brain absorbs so much energy, comes from the cosmos, comes from the environment of the cosmos, comes from the environment of this planetary system and the cosmos. We could not make you a full transmutation, and a full conversion, if we would not have, if we could not deliver the cosmic rays.

Now this technology is in the hand of the man. Where we do not work with the matter state anymore. You see pictures from NASA with beautiful gases exploding, and different colors. Now, through what we showed you as a production of the gases, and production of the Gans's conversion to gases (refers to Gas Units), was parallel to what is now today. Where we do not rely on the fields matter state, we rely on the fields, of the fields of the universe.

Many of you, when you walk into these systems, you see your Soul will shine. You'll feel the separation of the physicality from the STM. You will see, you will feel the love of the Creator, which is abundant in the Universe.

In the next few weeks, I'll change the history of man. I will change the knowledge of the man. Where the man sees the knowledge of the Creation and the Creator, and no attachment to this dimension of physicality as we see today. (:44). We will understand more, that this becomes literally, nothing.

The knowledge we gathered up to now becomes irrelevant, now we have access. The way the lady came in, couldn't speak English, and then she could speak English and understand the emotion of it. The way people come in and do all sorts of things, we've seen. You have access to all of it.

When you walk into the new systems, when you walk into these new flight systems, which carries the cosmological field strength of the Universe, you know you've been touched by the love of the Creator.

Those of you who booked in for transmutation, those of you who booked in for, to go to the Moon and the rest, you will feel it. Then the beauty of it is, once we teach you, once you see it, once we open the cage of the STM in the dimension, you become passengers of the Universe.

As I said, buy your ticket to come to us. It's a one way ticket. Because once you leave the system, if you decide, if your Soul has reached the point of maturity of understanding in the system, you never, ever will get into a car (again). You will not dream how it feels on the backside of the Moon, how does it feel on Jupiter, or how those it feel in another Galaxy, because your wish will bring you to that point. You taste it, you smell it, you feel it, the way, the Knowledge Seekers, I've explained to you, who went through the system. They didn't traveled, they arrived. Then we understand how much the knowledge of the man will change. (:46).

2023 will be the beginning of the world peace, 2023 will be the beginning of understanding the new knowledge of the Creation, 2023 will be where the man becomes educated with the knowledge of the Universe and Creation, the true way, not what is imagined to you. We'll see the travelers of the universe with us, and we become travelers of the Universe.

Building a system that could deliver cosmic rays, could deliver sustainable cosmic rays, could create GM field of the cosmos, was one of the biggest and hardest things for me to teach. Because man had to understand. And now we have reached that point. The systems are made, the systems are there, the systems are getting tested, and soon you will be part of it.

Those of you who have signed in to become transmuted the Mobile, they'll be one of the first ones that we will see. You will feel, we bring you in, and I hope, my deepest wish is, when you land on the front seat, you come in with a friend from another part of the Universe. You'll have to handle it. To me they are friends, to you it's a shock to your system.

We try to bring this new dimension that humanity understands the change, we try to bring this dimension in, that we can share the knowledge, we will open institutes in specific human positions in the coming months. (:48). Tel Aviv, Tehran, London, Arizona, Beijing, Delhi, in Brasilia, and other places. We'll work, that the knowledge is shared irrespective of color, race and religion. We teach you at the same time, the way we teach today, you're online, we teach in all the Institutes simultaneously.

This is what you will see coming up in the next few weeks, establishment of the Spaceship Institute in 12 nations, which they are the center of the power and conflict, to become one. It's the priority to bring One Race, One Nation, One Planet into operation, and we are ready for it to go. One of the reasons we delayed the teaching of today was this purpose. We were waiting for the meeting to confirm, to bring everything about that allows us to do.

Creating condition, the flight system with the cosmic rays is, in a way, brings you a lot of understanding, new understanding. In the new understanding, once we create the cosmic ray field forces with their own GM field, the matter state materials of our systems becomes irrelevant. They will dilute in the system. (:50). The fields itself will dominate the room. Still with the technology which is in our hand, and we understand, we can expand this beyond the dimension of what we call, physical observation. Which means the man will not see, but they will feel it.

In the room it's not your physicality, in the space of the space, is your Soul. Does your DNA matter? Irrelevant. Does the color of your eyes, the color of your skin matters anymore? Irrelevant. The cosmic flight systems is one of the steps that will bring maturity to man. We especially set up to do this in past four or five weeks. Now it's been set up primarily, that it's ready to be adopted, to become, to be part of the operation of what we call, cosmic flights.

As we have finished with your flight testing people, your Mobile people are the only ones, which goes through this process. Those of you who signed up to become Mobile. Now, we ask you, those of you who want to be into, what we call, the Moon, (:52). and the space development, you will become gradually involved. We'll bring you in, the way we brought, the way you came, the way we interacted with you. The Mobile, what we

call, passengers will be brought in, moved from one place to another, and gradually we establish a new flight system, new arrival system, because you don't fly anymore, you arrive at the destination.

This is part of what we call, progressive development of the knowledge for us to be. When I walked into the system this week, it was amazing what I could see. When I walked in, and I felt the field forces of it. It was amazing how much, how deep I could feel. To, not the essence of the physicality, but to the essence of the Soul. Mankind is ready to take that step up.

As I said, the new systems getting finished, hopefully in next two or three weeks, four weeks, depending what our people do, we'll start the Mobile system transmutation. As I said, our first passenger has been chosen. We have moved certain things to position in Austria, that we can deliver, we can go through the process. Then we inform you as a Mobile, what we call, test people, what you need to do. We ask you clearly what you need to do, where you want to go, and what you have to do before we move. (:54).

You live in Los Angeles and you want to be in Tehran, you have to follow a process and systematically we get your de-registered in the United States, with the American customs. And we enter you into territory of Iran in hand of the Iranian authorities. You want to go to Japan, it's the same. You want to come from Beijing to Austria, it's the same. Till we establish a system, that the governments feel free with the movement.

The biggest enemy, the biggest block for us coming to this point, will be the government trying to control, trying to keep hold, trying to be, trying to confine. There's one guarantee we will give. Anyone who gets into these systems, and anybody who comes out of these systems, will be peaceful, will not be an addict, will not be an alcoholic, and will never commit a crime.

This is the cornerstones of the new development of the new technologies. Step by step, we have to, in a way, gain the confidence of, what we call, different parts of this planet, in each other, and in that process, that we don't rely on world leaders. As I said to the American officials a few days ago, which of the world leaders you want to bring in to stop the mayhem? We don't need to take them to Den Haag, and go through different ways of months and years of courts. (:56). We want the world leaders, move the world leaders to where, not in the Americans, but where the society as a whole sees them to be fit in, to be fit to be there. Do we need to move the head of the states, which are, what we call, unjust, to a position of, for them to be understanding, through their Soul, their position, and return them back to their position. No man, no depths of this planet and Universe is far away from our control and ?? movement. The reality of the knowledge and the way we will touch, will be shown in the coming weeks and months.

As some of you know, we have started the shipment of the Universal Enhancement Units as of this month. This is prelude to what has been achieved and what is going to be done. Six units are getting set up to go to Arizona, three units will end up in the Keshe Foundation, what the call, center in Germany. Then the production, which already have

been paid for the materials, assembly will start in December, in January. And we start delivering, what we call, the Enhancement Units, as we have started this week.

We'll see, we understand, and we process the whole technology in "one go." I hope humanity is ready for the change to come. (:58). I hope man can understand the change that we bring. And I hope, sooner than later, the world governments come to agree that, we need to govern as One Nation to be able to be governable. Otherwise, there is no way on this planet, that you can hide and duck.

Development and delivery of the what we call, cosmic systems, which can contain the conditions of man's life in the Universe is in the process of completion. We can change, and keep the dimension of the cosmos fields, as it is for all the Universe, and change the parameters inside to the Earth level, to the level of the fields of a dog, a man, a tree. You want to feel how a tree feels, now with the completion of dimension of the cosmic rays, in a way, to hold on to get everything done, it's possible.

You wanted to know how it feels to be from another point and place in the Universe, we change the environment inside in G field strength, and the heartbeat, and the condition of the field forces of the GM field of the position, and the time and the space, you will arrive there, instantaneously.

As I said, many of you came at the beginning, and I repeated that many times, when you said you went to the depth of the ocean, when the first Knowledge Seekers came and said, they could feel the Moon and they could pick up the stones. (1:00). We didn't laugh, we just learned from you. How far our technology is correct, you can feel it. Now we have to bring the physicality. Physicality was, could not be confirmed on the Moon and Mars, because we don't have the cosmic ray levels that you could support the life on the Moon. Now we can, now we have.

And very soon, as I said to our colleagues in NASA, you chose, we'll take you there. This is the understanding of the Totality of knowledge of the Creation. In the bandwidth of the strength of the life of the man in the dimension of the Soul, we have the dimension fields of the Universe, and Unicose, we didn't know. As we didn't know our Soul was in the center of our body. Now we can move to that position instantaneously.

It's for man to understand the dimension of the field forces of his Creation. And for Man to understand the power that this new technology will give to man. Man will live for thousands of years, millions of years on the planetary Earth, dimension and size.

We'll try to explain this in more detail, that gradually in next four or five weeks, those of you who have registered for, what we call, Mobile system, to be prepared to move. We don't want to bring you here to Austria. After the first two or three trials, we want you to appoint a place and a time on this planet. Then we move you, (1:02). then we put you there, and then we allow you to be in that position.

And you have to be prepared, that whatever you receive at the point of arrival, you have to accept, because that was your wish. You live in the cold places in Canada, and you wish at that time to be in California, or Florida with your son, or your brother, you will end up sometimes with perfect American accent, with a clothes to be on the beach, which your Soul chooses to be, to cover itself.

It will be very interesting. How many of you will make an appointment with your brother or your lover in a deep oceans, in a submarine. And how many of you will go in the depths of the caves to see if I can be seen, I can be taken through the Earth materials. Test us. The only thing is, you can fail. Part of your leg will be on the top of the mountain and the rest of you down in the cave. It will be fantastic to see how fast you generate the leg you missed on top of the mountain.

But this is now a reality, as the Frenchman felt the push of the STP of the German. As I always say, we welcome you to the new world of science, technology and understanding of the Creation of life on this planet. And I hope, and I hope we'll see the end of all the miseries and mayhems for the human race. (1:04).

We'll have a break. We come back and we answer you a few questions. As we're late, we end up within an hour or two, with this week's teaching. Rick, would you like to take us to a break and this time show us, what we call, the pictures, and paintings and the other things done, the machineries which are now in the Center, but, what do you call it, we've seen enough of them.

**>> BREAK <<< 456 KSW 10/27/2022**

Gans Paintings shown by Rick (no videos again this week during break, Mr. Keshe speaks some things.)

K- This is done by an Italian artist, hopefully. So we have offered an exhibition in men's. So for her to run an exhibition center and seen a little bit work on this artist, if you're an artist, send us your work and see what we can do.

yes, so you can commission what you want to be drawn  
(1:06).

(1:08). K- I like this painting ..

Display wines next week ..

K- These are beautiful paintings and we try to bring in more other artists, Keshe Foundation artists. And the beauty with it is, you feel the energies, you understand.

Next week, we will display, if you remember Joel, from France. We will display the wines which are made by Gans's. (1:10). We cannot sell, what you call, wines or alcohol. They'll be there to show another dimension in Plasma Technology. We have received the bottles of this product, and to get involved in it, is not our job, and even for the vineyard, it's a lot of certification, licensing, and if they can export it, it's a different, what you call it, ball game, which is not our job. We put in the bottle of the wine, with the name of the vineyard on it, to show the first, what we call, wine Gans's. To you, make if you want, to get in touch with the vineyard, to order or see if you can get some.

But in principal, we put it as a sample to show the application of the technology, the way we did with the, what we call, Pain Pens, Pain Pads, the paintings, the sculpture. Now, it's another dimension into, what we call, application which is used and done. You can go directly to the vineyard and order whatever you like. But for us is to show how it's done, because the, what we call, how it's produced, how and what it was done, is in ?? of KF, ?? so Joel in the videos, and everything else which ?? he provided us. Thanks to him, he is at the moment, very openly helping, anybody who wants to be taught and how help with the vineyards, and some Knowledge Seekers already been in touch with him to get help or to understand what was done.

Anything else? (1:12).

(End of Break)

Questions: (1:14).

Q: .. Can you ask Mr. Keshe, my favorite teacher? I need his help on the Soul level. For six years I've had someone manipulating me is. He's been enlightened, but has taken to try to ruin me. Maybe he can do a prayer for me, I think he's referring to Mr. Keshe can do a prayer for me, when he is in the fields of the machine? Thank you.

K- We leave that to Universal Council and those who are there.

R: So, should Nick try to contact Universal Council, or is that all...

K- You don't need to do it. It's done at the Soul level. You see, sometimes we are, we think, but there's no reality to it. So, it's all, what you call, it's all emotion, which (we) feel somebody has done this to us, or whatever. But we don't get involved in that kind of thing.

We do a scientific work. ... Thank you. (1:16).

Any other question?

Q: Salomea .. Did you see or feel me? Because I had a dream, that you helped me to transmute from one unit to another unit and...

K- No.

Q: Not now. I mean, maybe one month before.

K- No. And even if I do I won't tell you anyway.

Q: Before this I went to the Moon and I have seen there, everything was green, not vegetation or anything, only dust and grey dust. It was my vision there, my vision when I went there.

K- You should have brought part of the Apollo one back to us, from the Moon landing site. Then we would have believed you. No. Thank you very much.

Q: Anyway, I didn't want to share this with you, maybe it was my wish. And my soul during my sleeping time get freedom and came to you in Linz, and you help me to transmute from one unit to another unit. It was like this. I remember it very well.

K – Thank you very much. (1:18). thank you ...

Any other question?

Q: .. The butterflies from the Keshe Foundation have started changing over time since we began using them seems. It seems a white materials is being produced. What is happening in these exactly? Can you elaborate?

K- What you mean? The Butterflies.. they interact. These butterflies are living things. That's why I say, if somebody tells you this is .. whatever. The butterflies you receive are a living field, it's not something just a black piece. They interact with the environment, they absorb energies from the environment, they give to the environment.

So, you might see change of color, you might see absorption of some material, it might fit into, in the environment where you live, could be saturated with certain kind of fields, and matter state that they manifests themselves within it. (1:20).

The construction of them have made them to be that way. The construction is in a specific way, but they do interact with the whole of the environment.

K- They're in a vacuum pack. So, unless you made a hole in it, or whatever. In a vacuum pack, they don't interact with the environment.

R: Just to be clear, they're made to stay in the vacuum pack, correct?

K- Yeah. They have to stay in the vacuum pack, yeah.

R: So, if changes happen to the structure of it, or the coating or something, it's not something to be concerned about, it's just a...

K- No. It's what it interacted with the environment. That's what they are.

Q: Any more news on the "Med-beds," production?

K- We have nothing to do with Med-beds.

Anything else?

Q: How to dissolve ourselves after manifesting physically, if we want to return?

K- You don't dissolve, you transmute. There is a way in our body, in our system, (1:22). which we can do and we always do. It's like when you dream you go somewhere else, when you wake up you're not somewhere else, you're still in the same bed. So, there is a way in the structure of the, what we call, dimension of the STM and STP, which keeps the connection to the position and the space of the movement. You can go to 20 different places, and then want to come back to the first place, you can still do that.

Q: .. How can we separate the different emotional histories of the plasma fields?

K- What was that?

R: I don't know, I'll try the question again. How can we separate the different emotional histories of the plasma fields? Is there an emotional history with a plasma field?

K- Everything has a history.

R: So, if plasma field has an emotional history, how can that be separated since the fields are interacting so much?

K- It's traces. I talked about this long time ago. It's traces, you always leave traces, it's part of the structure of the field of the Universe. This is how magnetic fields work. Can always go back down to the trace. (1:24).

Q: .. Does this mean radiation is being absorbed by them, by the butterflies? The vacuum pack is intact. There is a whitish material, almost like dried Gans, that has been emitted from the black.

K- They're in a vacuum pack. So, there should be no material. We've done, we've built not to have anything with them.

R: He says it's turning totally white.

K- So they're absorbing something, or process is happening within the layers. It's absorbing a field and producing. It has matched to your environment, to the strength of some materials, that it converts their fields into matter state inside.

These are vacuum packed, special packing material and they usually shouldn't have anything inside them, unless you do a transformation of the fields, or you have a hole you cannot see, that you allowed something to enter.

Any other question?

K- I said to one of the KS. I said, if you want a cheap ticket to go from, what you call it, from one place to another on this planet, now it's time for it to do. (1:26).

Q: .. (Internet breaking up ) I want to ask him, what happens when there is a pole shift. I have heard this will be in the next, maybe six months, it's very early.

R: ask question again

Q: What happens when there is a pole shift. I have heard this will be in the next, maybe six months .. Does it have something to do with us, with this transformation, or our flights? Or ...

K- .. Primarily nothing should happen. It's just a shift, everything shifts from, what so you call it, from North Pole to South Pole, as I call it. It's a saturation, nothing should happen. I explained this to a child what happened. (1:28). Doesn't make any difference if you're standing up or I hold your legs upside down, you're still there, you still live. It's just a field, and everything will switch with it. That it holds in the same position. If such a thing happens, as we see it, it would be registered in the geological layers, as the previous times has done. We'll see it.

Q: And it has nothing to do with the three day of darkness?

K- I don't think so.

K- If it has, what do you call it, the Sun changes polarity so often we don't see it, and everything else.

Q: One more question please. The Plasmatic mirrors, you told it's very good for the transformation, the Mobile transformation. I have heard you told it. Is there a special training I can do for it?

K- No, no. You can use it when we go. The people we chose, the Mobile. It's the best thing for you to do, because ..

Now that we have gone into the cosmology, or work of cosmic rays, a lot of new technologies will come up. You will understand a lot of things, a lot of new understandings in the coming weeks and months, will come out of the Keshe Foundation. Because up to now we didn't have access to create cosmic rays, now we can, cosmic fields, then it brings new dimensions into, I think, a lot of works.  
Thank you very much. (1:30).

Q: .. In Italy, people that make glass, or glasses, are closing down. So, can plasma technology help them, as they use a lot of electricity and gas.

K- How can we help them?

R: I'm not sure what she means...

K- It's the energy costs. They cannot sustain the energy costs. The costs has been so high. Economically is not worth to run them anymore. The price of the gas and electricity,

especially in Italy and Europe, has gone so high. That a lot of factories, a lot of businesses, which were using a lot of electricity or gas, are running into trouble.

You see that in the very straightforward way with, as I said before in a few teachings before is, you go to the supermarket and you see the prices of tomatoes going sky high. They used to be one Euro per kilo and now they're about three, four or five Euro per kilo. All because of the cost of energy. They use a lot of gas to grow tomatoes in some of the greenhouses, because they use the CO2 for the growth of them. So you're paying for they're putting expensive gas.

Any other question?

Q: .. How does it effect the way of thinking and life for when a Soul this technology is no longer in the first place, and has found other priorities? (1:32).

K- It will be really interesting, that's for sure. You have to adapt to it. We learn, we learned when we immigrate from one country to another. We have to live with new language, or whatever. Man very quickly we'll learn how to live in this transmutation through the Soul. Very, very quickly. Quicker than you think. You'll be so busy with it, you don't even remember you've done it.

Any other question?

Q: In the Mobile transformations, can I take my dog with?

K- Yes. You can bring your suitcase. We will become like Ryan Air. For an extra suitcase you pay a 1,000 extra, and for the backpack will be half price, for the dog will be 3 times the price.

Q: It's a small dog.

K- The size doesn't make any difference. The size doesn't matter. It's just the Soul we have to carry.

Q: My dog comes, I'll stay here.

K- Okay, what were you reading, please.

Q: .. Thank you again for all the love, which you give us through knowledge. (1:34). How is the construction of the city based on plasma technology going, and can be replicated in other countries? Thanks for your answer.

K- It's something we work on in the background. We're involved in two, three different locations. Because of what we went out to do in past 12 months, we left a lot of these just being there till we are ready for it. I hope we're very soon ready for.

With what we achieved now, where we are now, we should be able to create new dimensions even in what we wanted to do before. I'll explain this in a very, very slow way, that how we can actually create the fields of, without the matter states, and how we. We have to deliver it in a step by step position next few months, and then you'll understand.

Do we need to build the cities the way we do? Do we need a lot of things, which we have in the cities today? I don't see any room for hospitals the way we have it today. I don't see any room for courts and judges. I don't see any room for prisons. I don't see any places for churches and mosques. Because the STM is mature to understand the truth. I don't see any reason for places we call, palaces, what we call, center of power. (1:36). Gradually we'll come to understand these, very, very slowly, and we'll change for it, and ?? live by it. Do we need? There is no need for power stations, there is no need for power water supply centers, that we build our cities around water supply position. A lot of things will change, a lot of things will change.

Q: .. When the Lord said, that a material state within the system is irrelevant, we can compare with the human system, that when we ingest food from the moment it enters the mouth, it no longer behaves like a material state, but as fields.

K- Yes.

Q: That is why we say that, it is so in the macro as well as the micro. The Universe that is inside of us?

K- Yes, more or less, or 100%. Micro and macro is the STM and the Physicality of the man. Then it changes to Physicality of the man and the STM. Going from inside out. It's the same. Life will carry on in both dimensions.

R: There is a saying, make the inner as the outer, (1:38). and the outer as the inner, and then make the two one.

K- Yep. We're running into about 8:40. Shall we call it the day for today? It's been a long day. Thank you very much.

I hope we gave you enough information and knowledge today to understand the changes that will come. The changes which are on the way, and how humanity will handle this new change, is another point ?? dimension.

Thank you very much Rick. And hopefully we see you next week.

456 KSW October 27, 2022

END
